

Student Participation and Assignment Agreement

This Student Participation and Assignment Agreement is entered into as of the date of last signature (“Effective Date”) between the Arizona Board of Regents for Arizona State University (“ASU”), and Tanav Jalan (student name, “Student”).

ASU was awarded a contract to implement an effort titled **“Psyche: A Journey to a Metal World”** by the **National Aeronautics Space Administration (“NASA”)**. A portion of the Psyche award supports opportunities for students to engage in a wide variety of experiences, including courses and programs designed to advance the Psyche mission concept or contribute to a specific need.

Participation. As a participant in course/program titled, CSE 485, (“Program”) and Program activities/project (“Project”), Student agrees to observe all Program rules and ASU policies and procedures applicable to my participation in the Program and my role in a Project, including:

1. Student will make complete and orderly notes and records relating to the Project, including, as applicable, full and accurate descriptions of all experiments, observations, data, results, discoveries, inventions, designs, models, work of authorship (including computer software), mask works and the like;
2. Student will make the notes and records available for inspection and use at the request of ASU; and upon request, deliver them to ASU no later than the conclusion of participation in the Program;
3. Student will refrain from activities that may constitute or result in infringement of any patent, copyright, right of privacy or other legal right of any other party, this includes use of generative AI (such as ChatCPT, Dall-E, Bard, etc.) without proper citation;
4. Student will not disclose to others, nor use for any purpose other than for this Program, information that is identified as proprietary or confidential.
5. Student will not enter, contribute or otherwise input proprietary or confidential information into generative AI tools;
6. Student will not use the name, service marks, trademarks, logos or other marks of ASU in any news release, publicity, advertising, or other promotion without the prior written consent of ASU;
7. Student will use NASA service marks, trademarks, logos, or images only in accordance with NASA guidelines;
8. Student will not release any Program/Project information via any medium (e.g., hard copy, websites, generative AI tools, or social media platforms), without prior written approval;
9. Students are authorized to reference Program/Project information on their resume or portfolio required for seeking a job or higher education (applicable to resumes/portfolios in any medium);
10. Student agrees to use Project in a factual manner and not use it in any manner that might mislead others;
11. Student will not use Project to state or imply the endorsement by ASU or NASA of a commercial product, service, or activity; and
12. Student will promptly submit disclosures of discoveries, inventions, designs, works of authorship (including computer software), mask works and any other

intellectual property resulting from my participation in the Program/Project to ASU by way of Skysong Innovations.

Assignment. Student agrees to assign, and hereby does assign, to ASU all rights in any invention, discovery or work of authorship (including computer software), including improvements and derivative works, and any tangible materials embodied in or encompassed by the invention (“Invention”) that arise from Student’s participation and Program Project. Student also assigns all rights in patents and applications relating to those discoveries or inventions, including reissues, divisions, continuations, continuations-in-part, renewals, substitutes or extensions, along with any other rights arising from the Invention (“Rights”). Student further agrees to fully cooperate with ASU to execute any documents required or desired for perfecting these legal rights.

ASU grants back to Student a royalty free non-transferable license to make and use the Invention under the Rights for educational and research purposes while participating in the Program. ASU grants Student a non-exclusive royalty free non-transferable license for non-commercial purposes specifically to reference the Invention in a resume or portfolio required for seeking a job or higher education.

If any Invention arising from Student’s participation in the Project is commercialized or licensed by ASU, and it generates Net Revenue, the Student will be eligible to participate with other university inventors in the revenue sharing contemplated by the Arizona Board of Regents Intellectual Property Policy (6-908), in effect at the time of distribution.

Governing Law. This Agreement will be governed by the laws and courts of Arizona, supplemented as necessary by federal patent and copyright law.

Acknowledgement. Student acknowledges by his/her signature below that he/she: (i) has read through this Agreement and referenced websites thoroughly, asked any questions he/she had and has been provided answers that are satisfactory to him or her; (ii) has voluntarily entered into this Agreement; (iii) to the extent Student so desired, sought independent legal advice concerning Student’s rights, or voluntarily waived her or his right to do so; and, (iv) is of legal age to enter into legally binding Agreement.

The parties, by their authorized signatures below, acknowledge and agree to this Agreement on the Effective Date defined above.

Student
